The DENSO difference

Unique design features. Superior quality materials. Made to the strictest OEM standards. These are the exceptional credentials of DENSO's Wiper Blades – providing drivers with a safe, comfortable field of vision whatever the weather.

Fitted as original equipment to the windscreens of cars such as the Opel/Vauxhall Insignia, Citroën C-Crosser, Peugeot 4007, Toyota Auris and Toyota IQ DENSO Wiper Blades are the choice of leading car makers worldwide. Why? Because in our work as one of the world's foremost developers and manufacturers of original vehicle parts and systems, DENSO is a relentless pioneer of advanced Wiper Blade technologies. From Standard and Flat blades to the latest Hybrid designs, DENSO Wiper Blades combine intelligent design, top quality materials and accurate manufacture – ensuring they wipe better and last longer.

All these advantages are also available to aftermarket customers in our DENSO Wiper Blades programme. We put our unrivalled OE know-how and unique features into every replacement Wiper Blade we make, ensuring they deliver a clear, streak-free finish across thousands of driving miles. And with an extensive range of technologies and fitting options available, DENSO is your complete supplier.

Why choose DENSO Wiper Blades

- > Original equipment technology and quality guarantee outstanding wiping performance
- > Durable, non-corrosive materials, including a natural, high-compression rubber wiper, deliver long service life
- > Evenly cut edges ensure an effective wiping edge
- > Low profile inserts provide the perfect wiping angle
- > High coverage of Asian and European vehicle applications offer optimum customer convenience

So when you need replacement Wiper Blades, there's only one name to choose: DENSO.

Range

As well as superior OE quality and advanced design, DENSO's Wiper Blade programme for the aftermarket offers complete convenience and choice.

With 1,460 applications - covering 95% of the European car parc - there is a DENSO Wiper Blade for almost every car. Yet that coverage is achieved with only 57 convenient part references; making the programme the most consolidated range in the aftermarket.

What's more, the DENSO programme offers three, essential Wiper Blade types, and a choice of easy fitting options including bayonet, hook or twin screw installation systems. Choose from:

Standard Blades - A popular choice for the everyday motorist, DENSO's Standard Wiper Blades offer all-round, long-lasting performance with a selection of different blade and installation options.

Hybrid Blades - Truly advanced, OEM specification wiping technology - invented by DENSO - that blends outstanding wiping performance with stylish, integrated design.

Flat Blades - Intelligently engineered for close, even contact on any windscreen, DENSO's Flat Wiper Blades deliver long-lasting, streak-free performance in all weathers.

Wiper Blades | Technologies and Fitting Options

GB

Standard Blades

One of our top-selling Wiper Blade ranges, DENSO's Standard blades offer a selection of four, advanced blade profiles to suit different windscreens and vehicle styles. There are also four different choices of installation system, and three clip options to suit you and your customer.

DENSO's Standard Wiper Blades offer:

- > Durability
- > Strong, all metal blade arm
- > High-compression rubber wiper
- > Efficient design
- > Effective wiping edge with evenly cut edges
- > Low profile inserts provide the perfect wiping angle
- > Eight, evenly spaced contact points

Spoiler Wiper Blades

DENSO's vehicle manufacturer customers fit Wiper Blades with spoilers. This helps to sustain optimum wiping performance during high speed driving.

Curved Wiper Blades

Most popular European cars use a curved Wiper Blade on the passenger side. This allows the Wiper Blade to follow the shape of the windscreen and bonnet of the car. DENSO makes this technology available for the aftermarket.

Hybrid Blades

The combined advantages of advanced engineering, superior materials and futuristic design make DENSO's Hybrid Wiper Blades some of the most desirable in the world. It's no wonder they are the original equipment choice of some of the world's top vehicle marques. Featuring the same exacting technologies, our aftermarket range is the first to be launched by an OEM brand - and gives you and your customers unprecedented access to the future of wiper technology.

DENSO's Hybrid Wiper Blades offer:

Dynamic design

- > Fully covered, stylish, matt black body
- > Low profile, unobtrusive shape
- > Very easy to attach to wiper arm
- > Integrated fitting system

Superb performance

- > Common-use vertebra ensure superior surface-hold to the windscreen
- > Rigid, graphite-coated rubber blade for smooth, more efficient wiping performance

Customer convenience

- > Conveniently consolidated range

Style and Substance

DENSO introduced Hybrid Wiper Blades to the OE market in 2005. Designed with an integrated, fully covered blade and wiper arm they combine sophisticated design with a low, out-of-view profile. Inside the wiper housing, common-use vertebra deliver superior surface-holding capability; whilst the rigid, graphite-coated rubber blade delivers a smooth, more efficient wiping performance.

Blade Types

Installation Types

Flat Blades

A triumph of engineering design, DENSO's Flat Wiper Blades hug every windscreen closely and evenly to wipe away rain and debris in even the worst weather conditions. With sleek styling and long life, they offer all-round appeal to every motorist.

DENSO's Flat Wiper Blades offer:

Superior performance

- > Precise tailoring to the curvature of your windscreen for optimum efficiency
- > Even pressure distribution across the whole length of the blade delivers maximum windscreen contact; ensuring excellent visibility and safety in critical weather conditions
- > Aerodynamic profile ensures outstanding performance even at high speeds
- > Resistance in cold weather conditions – no icing of superstructure
- > Reduced surface area minimises wind noise

Easy fit

- > Innovative arm fitment makes blades easier to change, without the need for an adapter

Innovative design

- > Elegant, bracketless styling
- > Integrated aerodynamic spoiler

Blade Types

Installation Types

Inspection and Replacement

Wiper Blades are a crucial vehicle safety feature. They must be in good enough condition to clear rain, insects, dirt and snowflakes that can all collect on the windscreen. Use our guide to Wiper Blade inspection and replacement for safer, clearer driving vision.

Replacement advice

> How often should a Wiper Blade be replaced?

As a rule windscreen Wiper Blades should be replaced at least once per year. In northern Europe they will usually need replacing once in summer and once in winter as light and moisture deteriorate the rubber blade. In southern Europe the Wiper Blade's lifetime is shortened by intensive sun light (UV radiation), and will usually need annual replacement.

> Why replace?

Wiper Blades eventually deteriorate with use, producing a streaky or uneven finish on the windscreen. To ensure a clear, safe field of vision even in bad weather, it is important to ensure the Wiper Blades are regularly checked and replaced as soon as deterioration is seen.

Make it a date

As a general rule, Wiper Blades should be changed once a year.

Replacement Signs

These are the four main signs of Wiper Blade deterioration that are visible on the windscreen glass. These symptoms will help you determine when a Wiper Blade needs changing.

Streaking

Symptom:

> Narrow streaks are left on the windshield.

Cause:

> Foreign matter has attached itself to the rubber blade, or the edge of the blade is worn.

Remedy:

> First, clean the edge of the blade. If streaks still appear, replace the Wiper Blade.

Jumping

Symptom:

> Wiper Blade jumps and makes a lot of noise.

Cause:

> The Wiper Blade does not move smoothly across the windshield, but vibrates noisily and bounces.

Remedy:

> First, clean the windshield; then check the angle. If jumping persists, replace the Wiper Blade.

Unwiped Spots

Symptom:

> Wiper Blade leaves one or more unwiped spots.

Cause:

> Rubber deformation.

Remedy:

> Replace Wiper Blade.

Uneven Blade Pressure

Symptom:

> Wiper Blade does not contact the windshield surface evenly, leaving a large unwiped surface.

Cause:

> Out of shape Wiper Blade arm.

Remedy:

> Replace Wiper Blade.

Der DENSO-Unterschied

Einzigartige Designmerkmale. Überragende Qualitätswerkstoffe. Hergestellt nach strengsten OEM-Maßstäben. Das sind die außergewöhnlichen Referenzen der Wischblätter von DENSO – die Fahrern bei jedem Wetter ein sicheres, komfortables Sichtfeld liefern.

DENSO-Wischblätter werden als Erstausrüstung an den Frontscheiben von Autos wie dem Opel/Vauxhall Insignia, dem Citroën C-Crosser, dem Peugeot 4007, dem Toyota Auris und dem Toyota IQ angebracht und sind bei führenden Fahrzeugherstellern die Wischblätter der Wahl. Warum? Weil DENSO als einer der führenden Entwickler und Hersteller von Originalfahrzeugteilen der Welt unermüdlich an bahnbrechender fortschrittlicher Wischblatt-Technik arbeitet. DENSO-Wischblätter - von konventionellen und flachen Wischblättern bis hin zu den aktuellsten Hybridausführungen - vereinen durchgehend intelligentes Design, hochwertige Werkstoffe und präzise Fertigung. Sie wischen deshalb besser und sind langlebiger.

Alle diese Vorteile sind über unser DENSO-Wischblattsortiment auch für Aftermarket-Kunden erhältlich. Die einzigartigen Merkmale und unser unübertroffenes Knowhow als Erstausrüster stecken in jedem von uns hergestellten Ersatzwischblatt. Das Ergebnis sind klare, streifenfreie Scheiben für Tausende von gefahrenen Kilometern. Mit einem umfangreichen Angebot an Wischermodellen und Befestigungsversionen deckt DENSO Ihren gesamten Bedarf an Wischblättern ab.

Warum Sie sich für DENSO-Wischblätter entscheiden sollten

- > Erstausrüstertechnik und -qualität garantieren eine überragende Wischleistung
- > Haltbare nichtkorrodierende Werkstoffe einschließlich eines Wischgummis aus Naturkautschuk mit hoher Druckfestigkeit sorgen für lange Nutzungsdauer
- > Gleichmäßig geschnittene Kanten gewährleisten eine effektive Wischkante
- > Flache Einsätze sorgen für den perfekten Wischwinkel
- > Optimal für Kunden: Hohe Abdeckung asiatischer und europäischer Fahrzeuganwendungen

Wenn Ihre Wischblätter ersetzt werden müssen, gibt es deshalb eigentlich nur eine Wahl: DENSO.

Produktpalette

Neben überragender Erstausrüsterqualität und fortschrittlichem Design bietet das DENSO-Wischblattsortiment für den Aftermarket äußerst praktischen Nutzen und eine umfassende Auswahl.

Mit 1.460 Anwendungen, die 95 % des europäischen Fahrzeugbestands abdecken, gibt es für fast jeden Wagen ein DENSO-Wischblatt. Dabei wird diese Abdeckung mit nur 57 praktischen Artikelnummern erreicht: das Sortiment ist somit das am stärksten konsolidierte in der Ersatzteil- und Zubehörbranche.

Darüber hinaus bietet das DENSO-Sortiment drei essentielle Wischblattarten und eine Auswahl von unkomplizierten Montagesystemen: Bajonett-, Haken- und Doppelschrauben-Befestigungssysteme. Zur Auswahl stehen Ihnen:

Konventionelle Wischblätter - Für den generellen Einsatz allgemein beliebt. Mit einer Auswahl verschiedener Blatt- und Befestigungsversionen bieten die konventionellen Wischblätter von DENSO eine langlebige Allround-Leistung.

Hybridwischblätter - Echt fortschrittliche Erstausrüster-Wischblatttechnik, von DENSO entwickelt, die überragende Reinigungsleistung mit ansprechendem integriertem Design kombiniert.

Flache Wischblätter - Intelligent konstruiert für gleichmäßigen Anpressdruck an jedem Punkt der Scheibe. Die flachen Wischblätter von DENSO liefern über eine lange Lebensdauer bei jedem Wetter ein streifenfreies Wischergebnis.

Konventionelle Wischblätter

Das Sortiment der konventionellen Wischblätter ist einer der DENSO-Bestseller. Die konventionellen Wischblätter sind in vier fortschrittlichen Wischblattprofilen passend zu verschiedenen Frontscheiben- und Fahrzeugbauarten erhältlich. Außerdem gibt es vier verschiedene mögliche Befestigungssysteme und drei Halterungsversionen passend für Ihren Bedarf und den Bedarf Ihrer Kunden.

Konventionelle Wischblätter von DENSO bieten:

- > Langlebigkeit
- > Fester Wischerarm aus Metall
- > Wischgummi mit hoher Druckfestigkeit
- > Effiziente Bauart
- > Hochwirksame Wischlippe mit gleichmäßig geschnittenen Kanten
- > Flache Einsätze für den perfekten Wischwinkel
- > Acht Auflagepunkte in gleichmäßigen Abständen

Wischblätter mit Spoiler

DENSO bietet Spoiler-Wischblätter für optimale Wischleistung bei schneller Fahrt an.

Gekrümmte Wischblätter

Bei einigen beliebten europäischen Wagen ist auf der Beifahrerseite ein gekrümmtes Wischblatt montiert. Das Wischblatt ist so an die Form der Frontscheibe und der Motorhaube angepasst. DENSO bietet diese Technik für den Aftermarkt an.

Hybrid-Wischblätter

Die Hybrid-Wischblätter von DENSO vereinen fortschrittliche Technik und überragende Werkstoffe mit einem futuristischen Design. Diese Kombination macht die Wischblätter von DENSO weltweit äußerst begehrenswert. Es verwundert nicht, dass sie als Erstausrüstung in einige der führenden Automarken der Welt eingebaut werden. Das nach den gleichen strengen Anforderungen hergestellte DENSO-Aftermarket-Sortiment ist das erste, das von einer OEM-Marke auf den Markt gebracht wurde – und verleiht Ihnen und Ihren Kunden einen noch nie dagewesenen Zugang zur Scheibenwischertechnik der Zukunft.

Hybrid-Wischblätter von DENSO bieten:

Dynamisches Design

- > Völlig abdeckender, eleganter Körper in mattschwarz
- > Flache, unauffällige Form
- > Sehr leichte Anbringung am Wischerarm
- > Integriertes Befestigungssystem

Überzeugende Leistung

- > Segmente gewährleisten eine überragende Anpressung an der Frontscheibe
- > Glatte, effizientere Reinigungswirkung dank starrem, graphitbeschichtetem Wischgummi

Annehmlichkeit für den Kunden

- > Praktisch konsolidiertes Sortiment

Stil und Substanz

DENSO führte seine Hybrid-Wischblätter 2005 auf dem Erstausrüstermarkt ein. Die integrierte, vollständig abgedeckte Wischblatt- und Wischerarmkombination vereint hochentwickeltes Design mit einem flachen, versteckten Profil. Im Wischergehäuse bewirken Segmente eine vorzügliche Anlage an der Scheibe, während der starre graphitbeschichtete Wischgummi eine glatte, effizientere Reinigungswirkung liefert.

Flache Wischblätter

Die flachen Wischblätter von DENSO liegen eng an jeder Frontscheibe an und wischen Regen und Schmutz gleichmäßig ab, selbst bei schlechtestem Wetter. Dank ihrem gekonnten Styling und ihrer langlebigen Ausführung sind sie für jeden Fahrzeugbesitzer rundum attraktiv.

Flache Wischblätter von DENSO bieten:

Überzeugende Leistung

- > Optimale Wirksamkeit durch präzise Anpassung an die Krümmung der Frontscheibe
- > Gleichmäßige Druckverteilung über die gesamte Länge des Wischblatts sorgt für maximalen Kontakt mit der Scheibe. Das Ergebnis: exzellente Sicht und Sicherheit bei schwierigen Witterungsverhältnissen
- > Aerodynamisches Profil gewährleistet ein hervorragendes Wischergebnis, selbst bei hoher Fahrgeschwindigkeit
- > Beständigkeit bei kaltem Wetter – keine Eisablagerungen
- > Kleinere Oberfläche minimiert Windgeräusche

Einfache Befestigung

- > Leichter Wischblattwechsel ohne Adapter dank innovativer Armbefestigung

Innovatives Design

- > Elegantes, halterungsfreies Styling
- > Integrierter aerodynamischer Spoiler

Überprüfung und Wechsel

Wischblätter sind ein unerlässliches Sicherheitsmerkmal des Fahrzeugs. Sie müssen in gutem Zustand sein, um die Frontscheibe von Regen, Insekten, Schmutz und Schnee zu befreien, die sich auf ihr absetzen. Hier finden Sie unsere Tipps für die Überprüfung und den Wechsel von Wischblättern für eine sicherere, klarere Sicht während der Fahrt.

Wischblattwechsel-Informationen

> Wie oft müssen Wischblätter gewechselt werden?

In der Regel müssen Frontscheiben-Wischblätter jährlich mindestens einmal gewechselt werden. In Nordeuropa müssen sie jährlich ersetzt werden, da Licht und Feuchtigkeit den Wischgummi altern lassen. In Südeuropa verkürzt die intensive Sonneneinstrahlung (UV-Strahlen) die Standzeit von Wischblättern, so dass sie ebenfalls jährlich gewechselt werden müssen.

> Warum müssen Wischblätter gewechselt werden?

Wischblätter altern mit der Zeit und reinigen die Frontscheibe dann nicht mehr streifenfrei und gleichmäßig. Um selbst bei schlechtem Wetter ein klares, sicheres Sichtfeld sicherzustellen, müssen die Wischblätter regelmäßig kontrolliert werden. Sobald eine Verschlechterung des Wischergebnisses festgestellt wird, müssen sie ersetzt werden.

Nicht vergessen!

In der Regel müssen Wischblätter jährlich einmal gewechselt werden.

Anzeichen für einen erforderlichen Wischblattwechsel

Die Wischblattalterung ist an vier Hauptanzeichen auf der Frontscheibe erkennbar. Anhand dieser Symptome lässt sich feststellen, wann ein Wischblatt gewechselt werden muss.

Streifenbildung

Symptom:

> Auf der Frontscheibe bleiben schmale Schlieren oder Streifen zurück.

Ursache:

> Ablagerungen am Wischgummi oder Verschleiß der Wischblattkante.

Gegenmaßnahme:

> Säubern Sie zunächst die Kante des Wischblatts. Bleiben danach beim Wischen immer noch Streifen zurück, ist das Wischblatt zu ersetzen.

Springen

Symptom:

> Wischblatt springt und verursacht laute Geräusche.

Ursache:

> Das Wischblatt bewegt sich nicht sauber über die Frontscheibe, sondern vibriert laut und springt.

Gegenmaßnahme:

> Säubern Sie zunächst die Frontscheibe und prüfen Sie dann den Winkel des Wischblatts. Wenn das Wischblatt anschließend immer noch springen sollte, muss es ersetzt werden.

Ungewischte Stellen

Symptom:

> Der Scheibenwischer hinterlässt eine oder mehrere ungewischte Stellen.

Ursache:

> Der Wischgummi ist verformt.

Gegenmaßnahme:

> Ersetzen Sie das Wischblatt.

Ungleichmäßiger Andruch

Symptom:

> Ungleichmäßige Anlage des Wischblatts an der Scheibe. Wischblatt hinterlässt große ungewischte Fläche.

Ursache:

> Verformter Wischerarm.

Gegenmaßnahme:

> Ersetzen Sie das Wischblatt.

La différence DENSO

Caractéristiques conceptuelles uniques. Matériaux de qualité supérieure. Réalisés selon les normes 1ère monte les plus rigoureuses. Ces qualités exceptionnelles sont celles des balais d'essuie-glace DENSO – assurant aux conducteurs un champ de vision sûr et dégagé, quelles que soient les conditions climatiques.

Montés en tant qu'équipement d'origine sur les pare-brises de véhicules tels que l'Opel Insignia, le Citroën C-Crosser, la Peugeot 4007, la Toyota Auris et la Toyota IQ, les balais d'essuie-glace DENSO sont privilégiés par les grands constructeurs automobiles. Pourquoi ? Parce qu'en tant que développeur et fabricant leader mondial de systèmes et de pièces de véhicules d'origine, DENSO est un pionnier infatigable de technologies avancées des balais d'essuie-glace. Des balais standards aux balais plats aux conceptions hybrides les plus modernes, les balais d'essuie-glace DENSO réunissent une conception intelligente, des matériaux de première qualité et une fabrication de précision qui leur permettent d'assurer un meilleur essuyage et plus grande longévité.

Les clients du marché de la rechange peuvent également bénéficier de tous ces avantages grâce à notre programme de balais d'essuie-glace DENSO. Notre savoir-faire inégalé en matière d'équipement d'origine et nos caractéristiques uniques entrent dans chaque balai d'essuie-glace que nous fabriquons, assurant ainsi une surface de pare-brise nette, sans traînée sur des milliers de kilomètres de conduite. Sa gamme complète de technologies et d'options de montage font de DENSO votre fournisseur absolu.

Pourquoi choisir des balais d'essuie-glace DENSO

- > La technologie et la qualité équipement d'origine garantissent une performance de balayage exceptionnelle
- > Des matériaux durables, non-corrosifs, notamment une lame en caoutchouc naturel à haute compression, prolongent la durée de vie en service
- > Une découpe uniforme des bords assure une arête performante
- > Des raccords bas créent un angle d'essuyage parfait
- > Une vaste couverture des véhicules d'Asie et d'Europe optimise la sélection pour les clients

C'est pourquoi, lorsque vous devez remplacer vos balais d'essuie-glace, un seul nom s'impose : DENSO.

Les produits

Le programme DENSO de balais d'essuie-glace destinés au marché de la rechange offre une qualité constructeur d'origine supérieure et une conception avancée ainsi qu'une facilité de sélection et un choix complets.

Avec 1 460 applications - couvrant 95% du parc automobile européen – il existe un balai d'essuie-glace DENSO pour pratiquement n'importe quelle voiture, et 57 références pratiques suffisent pour assurer cette couverture, faisant de ce programme la gamme la plus consolidée du marché de la rechange.

De plus, le programme DENSO offre trois types essentiels de balais et un choix de fixations faciles à utiliser dont les systèmes d'installation à baïonnette, à crochet et à deux vis. Modèles au choix:

Balais Standards - Choix populaire pour la conduite quotidienne, les balais d'essuie-glace standards DENSO assurent une performance générale de longue durée avec une sélection de lames et d'options d'installation différentes.

Balais Hybrides - Technologie de balayage de qualité constructeur d'origine véritablement évoluée, développée par DENSO, qui réunit une performance de balayage exceptionnelle et une conception intégrée d'une grande élégance.

Balais Plats - Résultats d'une ingénierie intelligente pour un contact uniforme sur toute la surface de n'importe quel pare-brise, les balais d'essuie-glace plats DENSO garantissent une performance durable, sans traînée, par tous les temps.

Wiper Blades | Gamme de balais d'essuie-glace

F

Balais standards

Une de nos gammes qui rencontrent un franc succès, les balais d'essuie-glace standards DENSO offrent un choix de quatre profils de balais perfectionnés convenant à différents styles de pare-brises et de véhicules. Quatre systèmes d'installation différents sont également disponibles et trois options de clips conçus pour vous et votre client.

Les balais d'essuie-glace standards DENSO offrent les avantages suivants:

- > Durabilité
- > Bras robuste entièrement métallique
- > Lame en caoutchouc à haute compression
- > Conception efficace
- > Arête performante grâce à une découpe uniforme des bords
- > Raccords bas pour un angle de balayage parfait
- > Huit points de contact à espacement régulier

Balais d'essuie-glace de type spoiler

DENSO propose des balais de type spoiler en option pour garantir une performance de balayage optimale lors de la conduite à grande vitesse.

Balais d'essuie-glace incurvés

Certains véhicules populaires européens utilisent un balai d'essuie-glace incurvé du côté passager qui suit la forme du pare-brise et du capot. DENSO met cette technologie à la disposition du marché de la rechange.

Balais hybrides

En combinant les avantages d'une ingénierie de pointe, de matériaux de qualité supérieure et d'une conception futuriste, les balais d'essuie-glace hybrides DENSO figurent parmi les plus prisés dans le monde. Ce n'est donc pas étonnant que certains des plus grands constructeurs automobiles au monde les choisissent comme équipements d'origine. Bénéficiant des mêmes techniques rigoureuses, notre gamme destinée au marché de la rechange est la première à être lancée par une marque OEM - et vous ouvre un accès sans précédent, ainsi qu'à vos clients, à l'avenir de la technologie des balais d'essuie-glace.

Les balais d'essuie-glace hybrides DENSO offrent les caractéristiques suivantes:

Conception dynamique

- > Déflecteur stylé recouvrant l'ensemble du balai, élégante finition noire mate
- > Forme discrète à bas profil
- > Installation très facile au bras d'essuie-glace
- > Système de fixation intégré

Superbe performance

- > Vertèbre universelle assurant une capacité supérieure de maintien à la surface du pare-brise
- > Lame rigide en caoutchouc enduite de graphite pour une performance de balayage sans à-coups plus efficace

Côté pratique pour le client

- > Gamme de produits consolidée

Style et construction

DENSO a introduit des balais d'essuie-glace hybrides d'équipement d'origine en 2005. Conçus avec une lame et un bras d'essuyage intégrés complètement recouverts, ils allient une conception sophistiquée avec un raccord bas, hors de vue. À l'intérieur de la structure du balai, une vertèbre universelle assure une capacité supérieure de maintien à la surface, tandis que la lame rigide en caoutchouc enduite de graphite procure une performance de balayage fluide plus efficace.

Balais plats

Les balais d'essuie-glace plats DENSO épousent exactement chaque pare-brise pour éliminer la pluie et les débris, même dans les pires conditions météorologiques. Leur style élégant et leur durabilité les rendent attrayants auprès de tous les automobilistes.

Les balais d'essuie-glace plats DENSO offrent les caractéristiques suivantes:

Performance supérieure

- > Adaptation précise à la forme incurvée de votre pare-brise pour une efficacité optimale
- > Répartition égale de la pression sur toute la longueur du balai pour un contact maximum avec le pare-brise, assurant une sécurité et une visibilité excellentes dans les conditions météorologiques critiques
- > Profil aérodynamique pour une performance exceptionnelle même à grande vitesse
- > Résistance au froid - la superstructure ne gèle pas
- > Réduction du bruit du vent grâce à une diminution de la surface

Montage facile

- > Fixation innovatrice du bras pour un changement de lames aisé, sans adaptateur

Conception moderne

- > Style élégant, sans armature
- > Spoiler aérodynamique intégré

Contrôle et remplacement

Les balais d'essuie-glace jouent un rôle crucial dans la sécurité du véhicule. Ils doivent être en état d'éliminer la pluie, les insectes, les saletés et les flocons de neige pouvant s'accumuler sur le pare-brise. Notre guide sur le contrôle et le remplacement des balais d'essuie-glace vous aidera à assurer une conduite plus sûre avec une meilleure visibilité.

Conseils sur le remplacement

> A quelle fréquence doit-on remplacer un balai d'essuie-glace?

En règle générale, les balais d'essuie-glace devraient être remplacés au moins une fois par an. En Europe du Nord, ils doivent être changés chaque année car la lumière et l'humidité dégradent la lame en caoutchouc. En Europe du Sud, la durée de vie des balais d'essuie-glace est réduite par la lumière solaire intense (rayonnement UV), il faut donc également les remplacer tous les ans.

> Pourquoi les remplacer?

Les balais d'essuie-glace finissent par se détériorer à l'usage, causant un balayage irrégulier ou des traces sur le pare-brise. Afin d'assurer un champ de vision dégagé et sûr même en cas d'intempéries, il est important de les contrôler régulièrement et de les remplacer dès les premiers signes de détérioration.

Rendez-vous à ne pas manquer

En règle générale, les balais d'essuie-glace devraient être changés une fois par an.

Signes de remplacement nécessaire

Quatre signes principaux de détérioration sont visibles sur le pare-brise. Ces symptômes vous aideront à déterminer le moment de changer la lame d'essuie-glace.

Rayures

Symptôme:

> Des rayures fines restent sur le pare-brise.

Cause:

> Des matières étrangères se sont attachées à la lame en caoutchouc, ou le bord de la lame est usé.

Remède:

> Nettoyer d'abord la lame. Si les rayures persistent, remplacer le balai.

Broutage

Symptôme:

> Le balai d'essuie-glace sautille et fait beaucoup de bruit.

Cause:

> Le balai d'essuie-glace ne se déplace pas régulièrement sur la surface du pare-brise mais vibre bruyamment et rebondit.

Remède:

> Nettoyer d'abord le pare-brise puis vérifier l'angle d'attaque du balai d'essuie-glace. Si le broutement persiste, remplacer le balai.

Points

Symptôme:

> Le balai d'essuie-glace laisse des parties non-essuyées.

Cause:

> Déformation du caoutchouc.

Remède:

> Remplacer le balai.

Pression inégale de la lame

Symptôme:

> Le balai d'essuie-glace n'entre pas en contact uniformément sur toute la surface du pare-brise, laissant une grande surface non-essuyée.

Cause:

> Bras de balai d'essuie-glace déformé.

Remède:

> Remplacer le balai.

Skillnaden med DENSO

Unika funktioner: Överlägsen materialkvalitet. Konstruerad enligt de striktaste OEM-standarderna. De här enastående egenskaperna hos DENSO:s torkarblad ger föraren ett säkert, klart synfält oavsett väder.

Torkarblad från DENSO har valts av ledande biltillverkare över hela världen och finns installerade som originaldelar i bilar som Opel Insignia, Citroën C-Crosser, Peugeot 4007, Toyota Auris och Toyota IQ. Varför? Eftersom DENSO, som en av världens främsta utvecklare och tillverkare av originaldelar och system för fordon, är en outtröttlig pionjär inom avancerade torkarbladsteknologier. Torkarbladen från DENSO kombinerar intelligent konstruktion, förstklassiga kvalitetsmaterial och noggrann tillverkning, vilket ger bättre torkprestanda och längre hållbarhet.

Alla de här fördelarna finns även tillgängliga för eftermarknadskunder i vår DENSO torkarbladserie. Vi introducerar vårt oöverträffade OE-kunnande och våra unika funktioner i varje utbytesblad vi gör, så att de ger en klar finish utan ränder över tusentals mil. Och med ett omfattande utbud av teknologier och installationsalternativ är DENSO den kompletta leverantören.

Varför välja DENSO torkarblad?

- > Originaldelsteknologi och kvalitet garanterar en enastående torkförmåga
- > Robusta, rostfria material, inklusive ett torkarblad av högkomprimerat naturgummi, ger en lång livslängd
- > Jämnt tillskurna kanter säkerställer en effektiv torkkant
- > Lågprofilinlägg ger en perfekt torkningsvinkel
- > Bred täckning med asiatiska och europeiska fordonsapplikationer erbjuder optimal bekvämlighet för kunden

Så när ett utbytesblad behövs finns bara ett enda självklart val: DENSO.

Modeller

Förutom överlägsen OE-kvalitet och avancerad konstruktion erbjuder DENSO:s eftermarknadserie med torkarblad maximal valfrihet och användbarhet.

Med 1 480 tillämpningar - 95 % av den europeiska bilparken - finns det ett DENSO torkarblad för nästan varje bil. Den stora täckningen erhålls dessutom med användning av bara 57 komponenter, vilket gör modellprogrammet till det mest konsoliderade på eftermarknaden.

Dessutom erbjuder DENSO-programmet tre nödvändiga torkarbladstyper och ett urval enkla installationsalternativ, inklusive installationssystemen bajonettkoppling, krok och dubbelskruv. Välj mellan:

Standardblad - DENSO:s standardblad, som är ett populärt val för vardagsbilisten, erbjuder allsidig prestanda som räcker länge, tillsammans med ett urval olika blad och installationsalternativ.

Hybridblad - Verkligt avancerad torkarbladsteknologi i OEM-kvalitet - utvecklad av DENSO - som kombinerar enastående torkprestanda i en snygg och integrerad konstruktion.

Platta blad - DENSO:s platta torkarblad, med en intelligent konstruktion för nära, jämn kontakt med alla typer av vindrutor, tillhandahåller ultimata prestanda utan ränder oavsett väder.

Standardblad

Till en av våra bästsäljande torkarbladserier, DENSO:s standardblad, finns fyra olika avancerade bladprofiler att välja på, som passar olika vindrutor och fordonsstilar. Det finns också fyra olika val av installationsystem och tre olika klämmor för att passa dig och din kund.

DENSO:s standardtorkarblad erbjuder:

- > Beständighet
- > Stark bladarm helt i metall
- > Torkarblad av högkomprimerat gummi
- > Effektiv konstruktion
- > Effektiv torkkant med jämnt tillskurna ändar
- > Lågprofilinlägg ger en perfekt torkningsvinkel
- > Åtta kontaktpunkter jämnt utplacerade

Torkarblad Med Spoiler

DENSO erbjuder spoilerblad som ett alternativ för att upprätthålla optimala torkningsprestanda vid körning i hög hastighet.

Böjda Torkarblad

Vissa populära europeiska bilar har ett böjt torkarblad på passagerarsidan. Det här gör att torkarbladet kan följa vindrutans och motorhuvens form. DENSO gör den här teknologin tillgänglig för eftermarknaden.

Hybridblad

Sammantaget gör fördelarna med en avancerad konstruktion, överlägsna material och futuristisk design DENSO:s hybridblad till några av de mest eftersökta i världen. Det är därför inte konstigt att de väljs som OEM-torkarblad av några av världens bästa fordonstillverkare. Vår eftermarknadsserie, som är den första att lanseras av ett OEM-märke, har samma avancerade teknologi – och ger dig och kunden oöverträffad tillgång till framtidens torkarbladteknologi.

DENSO:s hybridtorkarblad erbjuder:

Dynamisk utformning

- > Snygg matt, svart, heltäckt inneslutning
- > Diskret form med låg profil
- > Mycket enkel att fästa på torkarmen
- > Integrerat anslutningssystem

Fantastiska prestanda

- > Gemensam stomme garanterar överlägsen ythållning mot vindrutan
- > Styvt, grafitbelagt gummiblad för mjuk, effektiv torkning

Enkelt för kunden

- > Bekvämt konsoliderad produktserie

Stil och substans

DENSO lanserade hybridbladen på OE-marknaden 2005. Bladen, som är konstruerade med integrerat, helt täckt blad och torkarm, kombinerar en sofistikerad konstruktion med en låg, diskret profil. En speciell ryggstomme i torkarbladsinneslutningen ger överlägsen ythållning mot rutan, medan det styva, grafitbelagda gummibladet ger en mjuk, effektivare torkning.

Platta Blad

DENSO:s platta torkarblad tätar perfekt mot alla typer av vindrutor för att hålla rent från regn och skräp även under värsta möjliga väderleksförhållanden. Bladens strömlinjeformade utformning, allsidighet och långa livslängd uppskattas av alla förare.

DENSO:s platta torkarblad erbjuder:

Överlägsen prestanda

- > Exakt anpassning till vindrutans buktning för optimal verkningsgrad
- > Jämn tryckfördelning över bladets hela längd ger maximal kontakt med vindrutan för utmärkt sikt och säkerhet även under svåra väderförhållanden
- > Aerodynamisk profil garanterar suveräna prestanda även i höga hastigheter
- > Klarar kyla – ingen igenisning av torkarenheten
- > Mindre yta minimerar vindljud

Enkel installation

- > Innovativ armkoppling förenklar bladbyten, utan att adapter krävs

Innovativ design

- > Elegant design utan beslag
- > Integrerad aerodynamisk spoiler

Inspektion Och Byte

Torkarbladen är mycket viktiga för fordonets säkerhet. De måste vara i tillräckligt bra skick för att kunna hålla vindrutan ren från regn, insekter, smuts och snö. Använd vår guide för inspektion och byte av torkarblad för bättre och säkrare sikt under körning.

Rekommendationer i samband med byte

> Hur ofta bör ett torkarblad bytas?

Som regel bör torkarblad bytas ut minst en gång per år. I norra Europa behöver de bytas ut en gång per år, eftersom solljus och fukt försämrar gummibladens verkningsgrad. I södra Europa förkortas torkarbladens livstid av starkt solljus (UV-strålning) och behöver därför också bytas ut en gång per år.

> Varför byta?

Torkarbladen slits ut med användning, vilket resulterar i ränder eller en ojämn rengöring av vindrutan. För att säkerställa klar, säker sikt även i dåligt väder är det viktigt att se till att torkarbladen kontrolleras regelbundet och byts ut så fort slitage upptäcks.

Planera in ett bytesdatum

Som en allmän regel bör torkarblad bytas ut en gång per år.

Tecken På Att Torkarblad Behöver Bytas

Följande är de fyra huvudsakliga tecknen på försämring av torkarbladens prestanda som visar sig på vindrutan. De här symptomen hjälper till att avgöra när ett torkarblad behöver bytas.

Ränder

Symptom:

> Smala ränder efterlämnas på vindrutan.

Orsak:

> Skräp har fastnat på gummiområdet, eller bladkanten är sliten.

Åtgärd:

> Rengör först bladändan. Byt ut torkarbladet om ränder ändå uppstår.

Hoppande Blad

Symptom:

> Torkarbladet hoppar och låter illa.

Orsak:

> Torkarbladet rör sig inte mjukt över vindrutan, utan vibrerar ljudligt och studsar.

Åtgärd:

> Rengör först vindrutan och kontrollera sedan vinkeln. Byt ut torkarbladet om det fortsätter hoppa.

Områden Som Inte Torkas

Symptom:

> Torkarbladet lämnar ett eller flera områden som inte torkas av.

Orsak:

> Gummid deformation.

Åtgärd:

> Byt ut torkarbladet.

Ojämnt Bladtryck

Symptom:

> Torkarbladet kommer inte i kontakt med vindrutan på ett jämnt sätt, så att en stor yta lämnas otorkad.

Orsak:

> Torkararmen deformerad.

Åtgärd:

> Byt ut torkarbladet.

Co wyróżnia wycieraczki DENSO?

Unikatowe cechy projektu. Materiały doskonałej jakości.

Wyprodukowane zgodnie z najbardziej wymagającymi normami OEM. Są to wyjątkowe cechy wycieraczek DENSO, które zapewniają kierowcy bezpieczne, komfortowe pole widzenia, bez względu na pogodę.

Wycieraczki DENSO, montowane jako oryginalne wyposażenie w takich samochodach jak Opel Insignia, Citroën C-Crosser, Peugeot 4007, Toyota Auris i Toyota IQ, zostały wybrane przez czołowych światowych producentów samochodów. Dlaczego? DENSO, jako jeden z przodujących w świecie producentów części i systemów samochodowych na pierwszy montaż jest pionierem zaawansowanych technologii wycieraczek. Wycieraczki DENSO, zarówno standardowe i płaskie, jak i najnowsze hybrydowe, łączą w sobie inteligentny projekt, materiały wysokiej jakości i precyzyjne wykonanie, zapewniając lepsze wycieranie szyb i dłuższą żywotność.

Wszystkie te zalety są także dostępne dla klientów rynku wtórnego w naszym programie wycieraczek DENSO. Każda wycieraczka, wyprodukowana przez nas jako część zamienna, nasyciona jest niezrównaną wiedzą technologiczną i ma unikatowe właściwości, co zapewnia przejrzyste, pozbawione smug szyby, na tysiące przejechanych kilometrów. A dzięki szerokiej gamie rozwiązań technologicznych i opcji montażu, DENSO jest dostawcą kompletnym.

Powody, dla których należy wybrać wycieraczki DENSO

- > Technologia oryginalnego wyposażenia i gwarantujące jakość, wyjątkowe wycieranie
- > Trwałe, nie ulegające korozji materiały, w tym pióro z naturalnej zagęszczonej gumy, zapewniające długą żywotność
- > Równo przycięta krawędź zapewniająca wysoką jakość wycierania
- > Niski profil wkładu gumowego gwarantujący właściwy kąt wycierania
- > Szeroki zakres zastosowań w pojazdach produkowanych w Azji i w Europie zapewnia optymalną wygodę klientów

Dlatego, gdy konieczna jest wymiana wycieraczek, wybór jest tylko jeden: DENSO.

Zakres

Program wycieraczek DENSO dla rynków wtórnych, obok doskonałej jakości oryginalnego wyposażenia i zaawansowanej konstrukcji, oferuje kompleksową wygodę i wybór.

1460 zastosowań, obejmujących 95% europejskiego rynku samochodowego sprawia, że wycieraczki DENSO dostępne są dla prawie każdego samochodu. Pokrycie to uzyskano za pomocą 57 wygodnych numerów katalogowych, co czyni ten program najbardziej skonsolidowaną ofertą na rynku.

Co więcej, program DENSO oferuje trzy podstawowe typy wycieraczek i wybór łatwych systemów montażu – typu bagnet, typu haczyk oraz montaż na dwie śruby. Można wybrać:

Wycieraczki Szkieletowe - Wycieraczki standardowe DENSO, popularny wybór codziennych użytkowników samochodów, oferują całoroczną, długotrwałą eksploatację z możliwością wyboru różnych piór i opcji montażu.

Wycieraczki Hybrydowe - Naprawdę zaawansowana, opracowana przez DENSO, technologia wycierania, spełniająca wymagania specyfikacji pierwszego montażu (OEM), łącząca wyjątkowe osiągnięcia ze stylową, zintegrowaną konstrukcją.

Wycieraczki Płaskie - Płaskie wycieraczki DENSO, z inteligentną konstrukcją zapewniającą bliski, równy kontakt z każdą szybą, cechuje długa żywotność i bezsmugowe wycieranie szyb w każdych warunkach atmosferycznych.

Wycieraczki szkieletowe

Szkieletowe wycieraczki DENSO, jeden z naszych najlepiej sprzedających się typów wycieraczek, posiadają cztery zaawansowane profile dopasowane do różnych szyb i pojazdów. Do wyboru są również cztery różne systemy montażowe i trzy opcje zacisków, dopasowane do potrzeb warsztatu i klientów.

Standardowe wycieraczki DENSO oferują:

- > Trwałość
- > Mocne ramię, wykonane w całości z metalu
- > Pióro ze zagęszczonej gumy
- > Wydajną konstrukcję
- > Wydajna, równo przycięta krawędź wycierania
- > Niski profil wkładu gumowego gwarantujący właściwy kąt wycierania
- > Ośiem równo rozmieszczonych punktów docisku

Wycieraczki ze spojlerem

DENSO oferuje wycieraczki ze spojlerem, - opcję która pozwala utrzymać optymalne wycieranie podczas jazdy z dużą prędkością.

Wycieraczki Profilowane

W niektórych popularnych samochodach europejskich na przedniej szybie od strony pasażera stosowane są wycieraczki profilowane. Umożliwia to dopasowanie wycieraczki do kształtu szyby i pokrywy silnika samochodu. DENSO udostępnia tę technologię dla rynku wtórnego.

Wycieraczki hybrydowe

Połączone zalety nowoczesnej konstrukcji, doskonałych materiałów i futurystyczny projekt, sprawiły, że wycieraczki hybrydowe DENSO są jednymi z najbardziej pożądanych na świecie. Nie budzi zdziwienia fakt, że zostały wybrane jako oryginalne wyposażenie do kilku czołowych światowych marek samochodowych.

Hybrydowe wycieraczki DENSO oferują:

Dynamiczną linię

- > Całkowicie zamkniętą, stylową, matową obudowę w kolorze czarnym
- > Dyskretny, nie rzucający się w oczy kształt
- > Bardzo łatwy zintegrowany system montażu na ramieniu wycieraczki

Doskonałe działanie

- > Rdzeń, umieszczony w obudowie wycieraczki, gwarantujący doskonałe przyleganie do powierzchni szyby
- > Sztywne, gumowe pióro z grafitową powłoką zapewniające gładkie i bardziej skuteczne wycieranie

Wygodę klienta

- > Wygodnie skonsolidowaną gamę produktów

Styl i istota

DENSO wprowadziło wycieraczki hybrydowe na rynek oryginalnego wyposażenia w 2005 roku. Wycieraczki te, posiadające całkowicie osłonięte pióro zintegrowane z ramieniem, łączą wyrafinowaną konstrukcję z dyskretną stylistyką. Rdzeń, umieszczony w obudowie wycieraczki, gwarantuje doskonałe przyleganie do powierzchni szyby, natomiast sztywne gumowe pióro z grafitową powłoką zapewnia gładkie i bardziej skuteczne wycieranie.

HACZYK

Wycieraczki płaskie

Płaskie wycieraczki DENSO przylegają ściśle i równo do każdej szyby tak, aby usuwać z szyby krople deszczu i zanieczyszczenia, nawet w najgorszych warunkach atmosferycznych. Dzięki eleganckiemu stylowi i trwałości, stanowią atrakcyjną całoroczną ofertę dla każdego użytkownika samochodu.

Płaskie wycieraczki DENSO oferują:

Doskonałe działanie

- > Dokładnie dopasowanie do profilu przedniej szyby w celu zapewnienia optymalnej wydajności
- > Równomierny docisk na całej długości wycieraczki zapewniający maksymalny kontakt z szybą, gwarantujący doskonałą widoczność i bezpieczeństwo w ekstremalnych warunkach pogodowych
- > Aerodynamiczny profil zapewniający znakomite wycieranie, nawet przy dużej prędkości
- > Odporność w niskich temperaturach - brak zamarzania powierzchni
- > Zmniejszoną powierzchnię minimalizującą szum powietrza

Łatwy montaż

- > Innowacyjny sposób montażu ramienia ułatwiający wymianę wycieraczki, bez potrzeby korzystania z dodatkowego adaptora

Innowacyjny projekt

- > Elegancki, opływowy kształt
- > Wbudowany spojler

Typy Wycieraczek

PŁASKA (P/N DF)

Sposoby Montażu

Sprawdzanie i wymiana

Wycieraczki mają decydujące znaczenie dla bezpieczeństwa pojazdu. Muszą być w wystarczająco dobrym stanie, aby usuwać deszcz, owady, brud i płatki śniegu, gromadzące się na szybie. Prosimy skorzystać z naszych wskazówek do sprawdzania i wymiany wycieraczek, w celu zapewnienia bezpieczniejszej i lepszej widzialności podczas jazdy.

Replacement advice

> Jak często należy wymieniać wycieraczki?

Zgodnie z zasadami wycieraczki należy wymieniać co najmniej raz w roku. W Europie Północnej wymagana jest coroczna wymiana, ponieważ światło słoneczne i wilgoć niszczą pióra wycieraczek. W Europie południowej żywotność wycieraczek skraca intensywnie promieniowanie słoneczne (promieniowanie UV) i coroczna wymiana jest również konieczna.

> Dlaczego wymieniać?

Wycieraczki zużywają się w trakcie eksploatacji, co powoduje nierówne wycieranie i powstawanie smug na szybie. Aby zapewnić wyraźne, bezpieczne pole widzenia, nawet przy złej pogodzie, ważne jest regularne sprawdzanie wycieraczek i ich wymiana w razie stwierdzenia zużycia.

Ustal termin

Zgodnie z ogólną zasadą, wycieraczki należy wymieniać co rok.

Oznaki zużycia wycieraczek

Wyróżnia się cztery podstawowe oznaki zużycia wycieraczek, widoczne na przedniej szybie. Objawy te pomagają określić moment, w którym konieczna jest wymiana wycieraczek.

Smużenie

Objawy:

- > Na szybie pozostają wąskie smugi.

Przyczyna:

- > Do gumowego pióra wycieraczki przywarły obce ciała lub nastąpiło wytarcie krawędzi pióra.

Środek zaradczy:

- > Najpierw wyczyścić krawędź pióra. Jeśli smugi występują nadal, należy wymienić wycieraczkę.

Podskakiwanie

Objawy:

- > Wycieraczka podskakuje i hałasuje.

Przyczyna:

- > Wycieraczka nie przesuwana się płynnie po szybie, lecz głośno drga i podskakuje.

Środek zaradczy:

- > Najpierw wyczyścić przednią szybę a następnie sprawdzić kąt wycierania. Jeśli wycieraczka nadal podskakuje wówczas należy ją wymienić.

Niewytarte Miejsca

Objawy:

- > Wycieraczka zostawia jedno lub kilka niewytartych miejsc.

Przyczyna:

- > Odształcenie gumowego pióra.

Środek zaradczy:

- > Wymienić wycieraczkę.

Nierówny Docisk Wycieraczki

Objawy:

- > Wycieraczka nie styka się równomiernie z powierzchnią szyby i pozostawia duże niewytarte powierzchnie.

Przyczyna:

- > Odształcenie ramienia wycieraczki.

Środek zaradczy:

- > Wymienić wycieraczkę.

Преимущество DENSO

Уникальные конструктивные особенности. Превосходное качество материалов. Производство в соответствии с высокими стандартами производителя оригинального оборудования. Это те характеристики щеток стеклоочистителей DENSO, которые обеспечат водителям безопасное и комфортное поле обзора в любую погоду.

Ведущие мировые производители автомобилей предпочитают стеклоочистители DENSO и устанавливают их в качестве стандартной комплектации на таких моделях как Opel Insignia, Citroën C-Crosser, Peugeot 4007, Toyota Auris и Toyota IQ. Почему? Потому что DENSO, являясь мировым лидером в разработке и производстве исходных деталей и систем автомобилей, неустанно внедряет передовые технологии стеклоочистителей. Как стандартные или плоские щетки, так и новейшие гибридные щетки (Hybrid) DENSO – все они соединяют в себе рациональный дизайн, высочайшее качество материалов и тщательность изготовления, обеспечивая прекрасную очистку стекол и более долгий срок службы щеток.

Все эти преимущества также доступны покупателям на вторичном рынке благодаря нашей программе щеток стеклоочистителей DENSO. Мы вкладываем непревзойденное ноу-хау оригинального оборудования в каждую производимую нами щетку, которая, в свою очередь, обеспечивает чистое, без разводов стекло на протяжении тысяч километров. Широкий ассортимент технологий и имеющиеся в наличии варианты адаптеров сделают DENSO вашим комплексным поставщиком.

Почему мы советуем выбрать щетки DENSO

- > Технология и качество оригинального оборудования гарантируют превосходные показатели очистки
- > Прочные коррозионно-стойкие материалы, включая натуральную высококомпрессионную резину щетки, обеспечивают долгий срок службы
- > Ровно обрезанная кромка гарантирует эффективную очистку
- > Низкопрофильные вставки обеспечивают идеальный угол прилегания к стеклу
- > Широкий ассортимент моделей, охватывающий азиатские и европейские автомобили, обеспечивает оптимальное удобство для покупателя

Именно поэтому, когда нужно заменить щетки, вам стоит выбрать DENSO.

Ассортимент

Программа щеток DENSO предлагает покупателям на вторичном рынке не только высшее качество оригинального оборудования и новые разработки, но и удобство и богатство выбора.

Тот факт, что 1 460 моделей щеток DENSO используются на 95% всех европейских автомобилей, гарантирует, что вы всегда подберете подходящие для вашей машины щетки. Ассортимент DENSO является одним из самых консолидированных на вторичном рынке, обеспечивая охват моделей на базе всего 57 наименований.

Более того, DENSO предлагает 3 основных вида стеклоочистителей и несколько вариантов креплений, включая штифт, крючок и винт. Вы можете выбрать следующие модели:

Стандартные щетки – популярный выбор на каждый день. Стандартные щетки DENSO гарантируют прекрасную очистку и долгий срок службы, они также предоставляются с разными видами и вариантами креплений.

Гибридные щетки – по-настоящему передовая технология, соответствующая спецификациям производителя оригинального оборудования и разработанная компанией DENSO, соединяет в себе превосходные показатели очистки с ультрасовременным монолитным дизайном.

Плоские щетки – разумно спроектированные щетки плотно и равномерно прилегают к любому типу ветрового стекла и обеспечивают долгий срок службы и безукоризненную очистку в любую погоду.

Wiper Blades | Ассортимент щеток

RU

Стандартные щетки

Стандартные щетки DENSO являются одной из самых продаваемых моделей. А четыре варианта усовершенствованных профилей позволяют выбрать щетки, подходящие для разных типов ветровых стекол и моделей автомобилей. Вы также можете выбрать одно из четырех видов креплений и один из трех видов адаптеров, подходящих вам и вашим клиентам.

Стандартные щетки DENSO – это:

- > Долгий срок службы
- > Крепкий металлический держатель
- > Щетки из высококомпрессионной резины
- > Эффективная конструкция
- > Эффективная чистящая кромка с гладко обрезанными краями
- > Низкопрофильные вставки, обеспечивающие идеальный угол очистки
- > Восемь равномерно распределенных контактных точек

Щетки стеклоочистителей спойлерного типа

По желанию заказчика DENSO предлагает щетки стеклоочистителей спойлерного типа для достижения оптимальных рабочих характеристик при вождении на высокой скорости.

Изогнутые щетки стеклоочистителей

Многие популярные европейские автомобили оснащены изогнутыми щетками стеклоочистителей на стороне пассажира. Это позволяет щетке прилегать, повторяя очертание ветрового стекла и капота автомобиля. Компания DENSO предоставляет эту технологию на вторичном рынке.

Гибридные щетки

Преимущества передовых разработок, превосходных материалов и футуристического дизайна в совокупности делают гибридные щетки DENSO самым желанным приобретением автолюбителей всего мира. Неудивительно, что ведущие мировые производители автомобилей выбрали эти щетки в качестве оригинального оборудования. Запуская ассортимент для вторичного рынка, наша компания предоставляет вам и вашим клиентам беспрецедентный доступ к стеклоочистительным технологиям будущего.

Гибридные щетки стеклоочистителей DENSO – это:

Динамичный дизайн

- > Полностью закрытые, стильные, с матовым черным покрытием
- > Низкий профиль, ненавязчивая форма
- > Очень просто крепятся на держателе щетки
- > Встроенная крепежная система

Превосходные показатели

- > Повсеместно используемые рычаги обеспечивают превосходное прилегание к ветровому стеклу
- > Неподвижная резиновая рабочая поверхность с графитовым покрытием обеспечивает более эффективные эксплуатационные качества

Удобство для покупателя

- > Удобно консолидированный ассортимент

Форма и содержание

Компания DENSO впервые представила гибридные щетки стеклоочистителя автопроизводителям в 2005 году. Созданные с интегрированной, полностью закрытой рабочей поверхностью и рычагом, они сочетают в себе утонченный (усовершенствованный) дизайн с низким незаметным профилем. Внутри спойлера (корпуса) щетки используемые рычаги обеспечивают превосходное прилегание к поверхности; в то время как неподвижная, покрытая графитом резиновая рабочая поверхность обеспечивает более эффективные эксплуатационные качества.

КРЮК

Плоские щетки

Плоские щетки DENSO плотно прилегают к любому ветровому стеклу и равномерно вытирают дождь и грязь даже при самых плохих погодных условиях. Элегантный стиль и долгий срок службы делают их привлекательными для многих автолюбителей.

Плоские щетки DENSO – это:

Превосходные показатели

- > Точная подгонка к изгибам вашего ветрового стекла для оптимальной эффективности работы
- > Равномерно распределяя давление по всей длине, щетки максимально прилегают к ветровому стеклу, обеспечивая тем самым отличную видимость и безопасность даже при самой непредвиденной погоде
- > Аэродинамический профиль обеспечивает превосходные показатели даже на высокой скорости
- > Морозоустойчивость – незамерзающий каркас
- > Уменьшенная рабочая поверхность снижает шум ветра

Простота установки

- > Инновационный рычаг позволяет просто менять щетки без использования адаптера

Инновационный дизайн

- > Элегантный стиль без креплений
- > Интегрированный аэродинамический спойлер

Осмотр и замена

Щетки являются одним из основных узлов системы безопасности автомобиля. Они должны быть в хорошем состоянии и обеспечивать эффективное удаление дождевой воды, насекомых, грязи и снега, которые могут накапливаться на ветровом стекле. Обращайтесь к нашему справочнику по осмотру и замене щеток и за информацией о более безопасном и четком обзоре при вождении.

Советы по замене

> Как часто надо заменять щетки стеклоочистителей?

Как правило, щетки необходимо менять как минимум раз в год. В северной Европе свет и влажность разрушают резиновую поверхность, и щетки требуют ежегодной замены. В южной Европе срок службы щетки стеклоочистителя уменьшается под влиянием интенсивного солнечного света (УФ-излучения) и, таким образом, щетки также нуждаются в ежегодной замене.

> Зачем заменять?

Со временем и по мере использования щетки стеклоочистителя изнашиваются, оставляют разводы или неровности на ветровом стекле. Поэтому, чтобы обеспечить четкое и безопасное поле обзора даже в плохую погоду, очень важно регулярно проверять щетки и заменять их при первых признаках износа.

Запишите себе эту дату в календарь

Возьмите себе за правило заменять щетки раз в год.

Признаки износа

Здесь представлены четыре основных признака износа щетки стеклоочистителя, которые можно увидеть на ветровом стекле. Они помогут вам определить, когда необходимо заменить щетки.

Полоски

Симптом:

- > На ветровом стекле остаются узкие полоски.

Причина:

- > Загрязняющие частички прилипли к резиновой вставке или кромка щетки изношена.

Способ устранения:

- > Сначала очистите кромку резинки. Если полоски появляются снова, замените щетку.

Рывки

Симптом:

- > Щетка с шумом и рывками движется по стеклу.

Причина:

- > Щетки неравномерно движутся по поверхности ветрового стекла и вибрируют с шумом и рывками.

Способ устранения:

- > Сначала вымойте ветровое стекло. Проверьте угол крепления; если рывки остаются, замените щетку.

Неочищенные участки

Симптом:

- > На стекле остаются большие неочищенные участки.

Причина:

- > Деформация резины.

Способ устранения:

- > Замените щетку.

Неравномерное давление на рабочую поверхность

Симптом:

- > Резиновый скребок не прилегает равномерно к стеклу, оставляя большие неочищенные поверхности.

Причина:

- > Деформация держателя щетки.

Способ устранения:

- > Замените щетку.
