## The DENSO difference

Unique design features. Superior quality materials. Made to the strictest OEM standards. These are the exceptional credentials of DENSO's Wiper Blades – providing drivers with a safe, comfortable field of vision whatever the weather.

Fitted as original equipment to the windshields of cars such as the Opel/Vauxhall Insignia, Citroën C-Crosser, Peugeot 4007, Toyota Auris and Toyota IQ DENSO Wiper Blades are the choice of leading car makers worldwide. Why? Because in our work as one of the world's foremost developers and manufacturers of original vehicle parts and systems, DENSO is a relentless pioneer of advanced Wiper Blade technologies. From Standard and Flat blades to the latest Hybrid designs, DENSO Wiper Blades combine intelligent design, top quality materials and accurate manufacture – ensuring they wipe better and last longer.

All these advantages are also available to aftermarket customers in our DENSO Wiper Blades programme. We put our unrivalled OE know-how and unique features into every replacement Wiper Blade we make, ensuring they deliver a clear, streak-free finish across thousands of driving miles. And with an extensive range of technologies and fitting options available, DENSO is your complete supplier.

### Why choose DENSO Wiper Blades

- > Original equipment technology and quality guarantee outstanding wiping performance
- > Durable, non-corrosive materials, including a natural, high-compression rubber wiper, deliver long service life
- > Evenly cut edges ensure an effective wiping edge
- > Low profile inserts provide the perfect wiping angle
- > High coverage of Asian and European vehicle applications offer optimum customer convenience

**So when you need replacement Wiper Blades, there's only one name to choose: DENSO.**

## Range

As well as superior OE quality and advanced design, DENSO's Wiper Blade programme for the aftermarket offers complete convenience and choice.

With 1,460 applications - covering 95% of the European car parc - there is a DENSO Wiper Blade for almost every car. Yet that coverage is achieved with only 57 convenient part references; making the programme the most consolidated range in the aftermarket.

What's more, the DENSO programme offers three, essential Wiper Blade types, and a choice of easy fitting options including bayonet, hook or twin screw installation systems. Choose from:

**Standard Blades** - A popular choice for the everyday motorist, DENSO's Standard Wiper Blades offer all-round, long-lasting performance with a selection of different blade and installation options.

**Hybrid Blades** - Truly advanced, OEM specification wiping technology - invented by DENSO - that blends outstanding wiping performance with stylish, integrated design.

**Flat Blades** - Intelligently engineered for close, even contact on any windscreen, DENSO's Flat Wiper Blades deliver long-lasting, streak-free performance in all weathers.

GB

## Standard Blades

One of our top-selling Wiper Blade ranges, DENSO's Standard blades offer a selection of four, advanced blade profiles to suit different windscreens and vehicle styles. There are also four different choices of installation system, and three clip options to suit you and your customer.

### DENSO's Standard Wiper Blades offer:

- > Durability
- > Strong, all metal blade arm
- > High-compression rubber wiper
- > Efficient design
- > Effective wiping edge with evenly cut edges
- > Low profile inserts provide the perfect wiping angle
- > Eight, evenly spaced contact points

### Spoiler Wiper Blades

DENSO's vehicle manufacturer customers fit Wiper Blades with spoilers. This helps to sustain optimum wiping performance during high speed driving.

### Curved Wiper Blades

Most popular European cars use a curved Wiper Blade on the passenger side. This allows the Wiper Blade to follow the shape of the windscreen and bonnet of the car. DENSO makes this technology available for the aftermarket.

### Blade Types

### Installation Types

### Clip Types

## Hybrid Blades

The combined advantages of advanced engineering, superior materials and futuristic design make DENSO's Hybrid Wiper Blades some of the most desirable in the world. It's no wonder they are the original equipment choice of some of the world's top vehicle marques. Featuring the same exacting technologies, our aftermarket range is the first to be launched by an OEM brand - and gives you and your customers unprecedented access to the future of wiper technology.

### DENSO's Hybrid Wiper Blades offer:

#### Dynamic design

- > Fully covered, stylish, matt black body
- > Low profile, unobtrusive shape
- > Very easy to attach to wiper arm
- > Integrated fitting system

#### Superb performance

- > Common-use vertebra ensure superior surface-hold to the windscreen
- > Rigid, graphite-coated rubber blade for smooth, more efficient wiping performance

#### Customer convenience

- > Conveniently consolidated range

### Style and Substance

DENSO introduced Hybrid Wiper Blades to the OE market in 2005. Designed with an integrated, fully covered blade and wiper arm they combine sophisticated design with a low, out-of-view profile. Inside the wiper housing, common-use vertebra deliver superior surface-holding capability; whilst the rigid, graphite-coated rubber blade delivers a smooth, more efficient wiping performance.

### Blade Types

### Installation Types

## Flat Blades

A triumph of engineering design, DENSO's Flat Wiper Blades hug every windscreen closely and evenly to wipe away rain and debris in even the worst weather conditions. With sleek styling and long life, they offer all-round appeal to every motorist.

### DENSO's Flat Wiper Blades offer:

#### Superior performance

- > Precise tailoring to the curvature of your windscreen for optimum efficiency
- > Even pressure distribution across the whole length of the blade delivers maximum windscreen contact; ensuring excellent visibility and safety in critical weather conditions
- > Aerodynamic profile ensures outstanding performance even at high speeds
- > Resistance in cold weather conditions - no icing of superstructure
- > Reduced surface area minimises wind noise

#### Easy fit

- > Innovative arm fitment makes blades easier to change, without the need for an adapter

#### Innovative design

- > Elegant, bracketless styling
- > Integrated aerodynamic spoiler

### Blade Types

### Installation Types

## Inspection and Replacement

Wiper Blades are a crucial vehicle safety feature. They must be in good enough condition to clear rain, insects, dirt and snowflakes that can all collect on the windscreen. Use our guide to Wiper Blade inspection and replacement for safer, clearer driving vision.

### Replacement advice

#### > How often should a Wiper Blade be replaced?

As a rule windscreen Wiper Blades should be replaced at least once per year. In northern Europe they will usually need replacing once in summer and once in winter as light and moisture deteriorate the rubber blade. In southern Europe the Wiper Blade's lifetime is shortened by intensive sun light (UV radiation), and will usually need annual replacement.

#### > Why replace?

Wiper Blades eventually deteriorate with use, producing a streaky or uneven finish on the windscreen. To ensure a clear, safe field of vision even in bad weather, it is important to ensure the Wiper Blades are regularly checked and replaced as soon as deterioration is seen.

#### **Make it a date**

*As a general rule, Wiper Blades should be changed once a year.*

## Replacement Signs

These are the four main signs of Wiper Blade deterioration that are visible on the windscreen glass. These symptoms will help you determine when a Wiper Blade needs changing.

### Streaking

#### Symptom:

> Narrow streaks are left on the windshield.

#### Cause:

> Foreign matter has attached itself to the rubber blade, or the edge of the blade is worn.

#### Remedy:

> First, clean the edge of the blade. If streaks still appear, replace the Wiper Blade.

### Jumping

#### Symptom:

> Wiper Blade jumps and makes a lot of noise.

#### Cause:

> The Wiper Blade does not move smoothly across the windshield, but vibrates noisily and bounces.

#### Remedy:

> First, clean the windshield; then check the angle. If jumping persists, replace the Wiper Blade.

### Unwiped Spots

#### Symptom:

> Wiper Blade leaves one or more unwiped spots.

#### Cause:

> Rubber deformation.

#### Remedy:

> Replace Wiper Blade.

### Uneven Blade Pressure

#### Symptom:

> Wiper Blade does not contact the windshield surface evenly, leaving a large unwiped surface.

#### Cause:

> Out of shape Wiper Blade arm.

#### Remedy:

> Replace Wiper Blade.

## Преимущество DENSO

Уникальные конструктивные особенности. Превосходное качество материалов. Производство в соответствии с высокими стандартами производителя оригинального оборудования. Это те характеристики щеток стеклоочистителей DENSO, которые обеспечат водителям безопасное и комфортное поле обзора в любую погоду.

Ведущие мировые производители автомобилей предпочитают стеклоочистители DENSO и устанавливают их в качестве стандартной комплектации на таких моделях как Opel Insignia, Citroën C-Crosser, Peugeot 4007, Toyota Auris и Toyota IQ. Почему? Потому что DENSO, являясь мировым лидером в разработке и производстве исходных деталей и систем автомобилей, неустанно внедряет передовые технологии стеклоочистителей. Как стандартные или плоские щетки, так и новейшие гибридные щетки (Hybrid) DENSO – все они соединяют в себе рациональный дизайн, высочайшее качество материалов и тщательность изготовления, обеспечивая прекрасную очистку стекол и более долгий срок службы щеток.

Все эти преимущества также доступны покупателям на вторичном рынке благодаря нашей программе щеток стеклоочистителей DENSO. Мы вкладываем непревзойденное ноу-хау оригинального оборудования в каждую производимую нами щетку, которая, в свою очередь, обеспечивает чистое, без разводов стекло на протяжении тысяч километров. Широкий ассортимент технологий и имеющиеся в наличии варианты адаптеров сделают DENSO вашим комплексным поставщиком.

### Почему мы советуем выбрать щетки DENSO

- > Технология и качество оригинального оборудования гарантируют превосходные показатели очистки
- > Прочные коррозионно-стойкие материалы, включая натуральную высококомпрессионную резину щетки, обеспечивают долгий срок службы
- > Ровно обрезанная кромка гарантирует эффективную очистку
- > Низкопрофильные вставки обеспечивают идеальный угол прилегания к стеклу
- > Широкий ассортимент моделей, охватывающий азиатские и европейские автомобили, обеспечивает оптимальное удобство для покупателя

**Именно поэтому, когда нужно заменить щетки, вам стоит выбрать DENSO.**

## Ассортимент

Программа щеток DENSO предлагает покупателям на вторичном рынке не только высшее качество оригинального оборудования и новые разработки, но и удобство и богатство выбора.

Тот факт, что 1 460 моделей щеток DENSO используются на 95% всех европейских автомобилей, гарантирует, что вы всегда подберете подходящие для вашей машины щетки. Ассортимент DENSO является одним из самых консолидированных на вторичном рынке, обеспечивая охват моделей на базе всего 57 наименований.

Более того, DENSO предлагает 3 основных вида стеклоочистителей и несколько вариантов креплений, включая штифт, крючок и винт. Вы можете выбрать следующие модели:

**Стандартные щетки** – популярный выбор на каждый день. Стандартные щетки DENSO гарантируют прекрасную очистку и долгий срок службы, они также предоставляются с разными видами и вариантами креплений.

**Гибридные щетки** – по-настоящему передовая технология, соответствующая спецификациям производителя оригинального оборудования и разработанная компанией DENSO, соединяет в себе превосходные показатели очистки с ультрасовременным монолитным дизайном.

**Плоские щетки** – разумно спроектированные щетки плотно и равномерно прилегают к любому типу ветрового стекла и обеспечивают долгий срок службы и безукоризненную очистку в любую погоду.

RU

## Стандартные щетки

Стандартные щетки DENSO являются одной из самых продаваемых моделей. А четыре варианта усовершенствованных профилей позволяют выбрать щетки, подходящие для разных типов ветровых стекол и моделей автомобилей. Вы также можете выбрать одно из четырех видов креплений и один из трех видов адаптеров, подходящих вам и вашим клиентам.

### Стандартные щетки DENSO – это:

- > Долгий срок службы
- > Крепкий металлический держатель
- > Щетки из высококомпрессионной резины
- > Эффективная конструкция
- > Эффективная чистящая кромка с гладко обрезанными краями
- > Низкопрофильные вставки, обеспечивающие идеальный угол очистки
- > Восемь равномерно распределенных контактных точек

### Щетки стеклоочистителей спойлерного типа

По желанию заказчика DENSO предлагает щетки стеклоочистителей спойлерного типа для достижения оптимальных рабочих характеристик при вождении на высокой скорости.

### Изогнутые щетки стеклоочистителей

Многие популярные европейские автомобили оснащены изогнутыми щетками стеклоочистителей на стороне пассажира. Это позволяет щетке прилегать, повторяя очертание ветрового стекла и капота автомобиля. Компания DENSO предоставляет эту технологию на вторичном рынке.

#### Типы щеток

##### ИЗОГНУТЫЕ

##### С ЗАДАННОЙ ФОРМОЙ

##### СПОЙЛЕРНЫЕ (P/N DMS)

##### ПРЯМЫЕ

#### Типы креплений

##### ШТИФТ

##### КРЮЧОК

##### ВИНТОВАЯ КРЫШКА (9,5 X 3,5 MM)

##### ВИНТ

#### Типы адаптеров

##### АДАПТЕР А

##### АДАПТЕР В

##### АДАПТЕР С

### Гибридные щетки

Преимущества передовых разработок, превосходных материалов и футуристического дизайна в совокупности делают гибридные щетки DENSO самым желанным приобретением автолюбителей всего мира. Неудивительно, что ведущие мировые производители автомобилей выбрали эти щетки в качестве оригинального оборудования. Запуская ассортимент для вторичного рынка, наша компания предоставляет вам и вашим клиентам беспрецедентный доступ к стеклоочистительным технологиям будущего.

**Гибридные щетки стеклоочистителей DENSO – это:**

#### Динамичный дизайн

- > Полностью закрытые, стильные, с матовым черным покрытием
- > Низкий профиль, ненавязчивая форма
- > Очень просто крепятся на держателе щетки
- > Встроенная крепежная система

#### Превосходные показатели

- > Повсеместно используемые рычаги обеспечивают превосходное прилегание к ветровому стеклу
- > Неподвижная резиновая рабочая поверхность с графитовым покрытием обеспечивает более эффективные эксплуатационные качества

#### Удобство для покупателя

- > Удобно консолидированный ассортимент

#### Форма и содержание

Компания DENSO впервые представила гибридные щетки стеклоочистителя автопроизводителям в 2005 году. Созданные с интегрированной, полностью закрытой рабочей поверхностью и рычагом, они сочетают в себе утонченный (усовершенствованный) дизайн с низким незаметным профилем. Внутри спойлера (корпуса) щетки используемые рычаги обеспечивают превосходное прилегание к поверхности; в то время как неподвижная, покрытая графитом резиновая рабочая поверхность обеспечивает более эффективные эксплуатационные качества.

#### Типы щеток

##### ГИБРИДНЫЕ (P/N DU)

#### Типы креплений

##### КРЮК

### Плоские щетки

Плоские щетки DENSO плотно прилегают к любому ветровому стеклу и равномерно вытирают дождь и грязь даже при самых плохих погодных условиях. Элегантный стиль и долгий срок службы делают их привлекательными для многих автолюбителей.

**Плоские щетки DENSO – это:**

#### Превосходные показатели

- > Точная подгонка к изгибам вашего ветрового стекла для оптимальной эффективности работы
- > Равномерно распределяя давление по всей длине, щетки максимально прилегают к ветровому стеклу, обеспечивая тем самым отличную видимость и безопасность даже при самой непредвиденной погоде
- > Аэродинамический профиль обеспечивает превосходные показатели даже на высокой скорости
- > Морозоустойчивость – незамерзающий каркас
- > Уменьшенная рабочая поверхность снижает шум ветра

#### Простота установки

- > Инновационный рычаг позволяет просто менять щетки без использования адаптера

#### Инновационный дизайн

- > Элегантный стиль без креплений
- > Интегрированный аэродинамический спойлер

#### Типы щеток

##### ПЛОСКИЕ (P/N DF)

#### Типы креплений

##### ЗАЩЕЛКА

##### ЗАДВИЖКА

##### ЗАКРЫТОЕ КРЕПЛЕНИЕ

##### БОКОВОЕ КРЕПЛЕНИЕ XL

##### БОКОВОЕ КРЕПЛЕНИЕ

## Осмотр и замена

Щетки являются одним из основных узлов системы безопасности автомобиля. Они должны быть в хорошем состоянии и обеспечивать эффективное удаление дождевой воды, насекомых, грязи и снега, которые могут накапливаться на ветровом стекле. Обращайтесь к нашему справочнику по осмотру и замене щеток и за информацией о более безопасном и четком обзоре при вождении.

### Советы по замене

#### > Как часто надо заменять щетки стеклоочистителей?

Как правило, щетки необходимо менять как минимум раз в год. В северной Европе свет и влажность разрушают резиновую поверхность, и щетки требуют ежегодной замены. В южной Европе срок службы щетки стеклоочистителя уменьшается под влиянием интенсивного солнечного света (УФ-излучения) и, таким образом, щетки также нуждаются в ежегодной замене.

#### > Зачем заменять?

Со временем и по мере использования щетки стеклоочистителя изнашиваются, оставляют разводы или неровности на ветровом стекле. Поэтому, чтобы обеспечить четкое и безопасное поле обзора даже в плохую погоду, очень важно регулярно проверять щетки и заменять их при первых признаках износа.

**Запишите себе эту дату в календарь**

*Возьмите себе за правило заменять щетки раз в год.*

## Признаки износа

Здесь представлены четыре основных признака износа щетки стеклоочистителя, которые можно увидеть на ветровом стекле. Они помогут вам определить, когда необходимо заменить щетки.

### Полоски

#### Симптом:

> На ветровом стекле остаются узкие полоски.

#### Причина:

> Загрязняющие частички прилипли к резиновой вставке или кромка щетки изношена.

#### Способ устранения:

> Сначала очистите кромку резинки. Если полоски появляются снова, замените щетку.

### Рывки

#### Симптом:

> Щетка с шумом и рывками движется по стеклу.

#### Причина:

> Щетки неравномерно движутся по поверхности ветрового стекла и вибрируют с шумом и рывками.

#### Способ устранения:

> Сначала вымойте ветровое стекло. Проверьте угол крепления; если рывки остаются, замените щетку.

### Неочищенные участки

#### Симптом:

> На стекле остаются большие неочищенные участки.

#### Причина:

> Деформация резины.

#### Способ устранения:

> Замените щетку.

### Неравномерное давление на рабочую поверхность

#### Симптом:

> Резиновый скребок не прилегает равномерно к стеклу, оставляя большие неочищенные поверхности.

#### Причина:

> Деформация держателя щетки.

#### Способ устранения:

> Замените щетку.
